1.	The construction work in the barracks buildings at Werneuchen airfield, which has been under way for some time, had been turned over by the special construction staff in Frankfurt/Oder to the Bernau Kreisbaubetrieb (district construction firm). The latter ordered its branch office in Werneuchen to do the work at the airfield. About 16 workers were employed in early June 1954. It appeared that official	0

The latter ordered its branch office in Werneuchen to do the work at the airfield. About 16 workers were employed in early June 1954. It appeared that official numerical designations of the quartering buildings were changed. The following changes were determined: U 55 to No 15, U 53 to No 16, U 5 to No 17, U 48 to No 18, U 49 to No 19, and U 47 to No 37. The build ings on Normannen Strasse were assigned new numbers. A total of 16 patients were in the hospital where a cement floor with an outlet pipe was being laid in a large room. In mid-July, work at the field was nearing completion. Only two fatigue details each of 6 to 8 men were still working in the billeting area. Building U 46 housed a sho	0 25X1 2 - 25X1

A total of 16 patients were in the hospital where a cement floor with an outlet pipe was being laid in a large room. In mid-July, work at the field was nearing completion. Only two fatigue details each of 6 to 8 men were still working in the billeting area. Building U 46 housed a sho in which German sales personnel were employed. Between 0800 and 0900 on 17 July, there was air activity by about 5 Il-28s and Uil-28s which took off individually and made flights of about 15 minutes duration near the field. A radio truck was parked near the runway. During the early morning of 7 August. 35 Il-28s and	25X1 2 25X1 25X1 25X 25X

A radio truck was parked near the runway. During the early morning of 7 August. 35 Il-28s and Uil-28s were rounted at the field. Between 0900 and 1600 on 27 July, individual flights were made by	25X1 2 25X1 25X1 25X 25X

80 meters north of the northwestern corner of the runway. The antenna looked like an uncovered umbrella turned upside down.

Comment. For sketch of billeting area at Werneuchen airfield, see Annex 1. The old numerical designations are entered on the sketch.

25X1

Comment. It is believed that Werneuchen airfield is occupied 3. by two bomber regiments with about 50 Il-28s.

The radio installations are known. Source 2 made a sketch of the radio truck observed on 17 July. For sketch, see Annex 2. Of AA radar sets only the model AA 1 MK 2 was reported previously.

25X

25)

Comment. The 8 x 76-mm AA guns from the northwestern AA gun emplacement were loaded on 11 July 1954 for firing practices in Neubukow. The 6 x 37-mm AA guns returned from Neubukow on 9 July and since that date have been parked in the garage in the northwestern section of the field.
